

SYM08 Ocular Pathology and Oncology: A Combined Approach to Eye Tumors

Combined Meeting with the American Association of Ophthalmic Pathologists (AAOP) and the International Society of Ocular Oncology (ISOO)

Increasingly, the treatment of ocular malignancy requires the combined efforts of ocular oncologists, pathologists, radiation oncologists, and even genetic counselors. There have been substantive changes in the management of these conditions, including the use of new topical, intravenous, and intra-arterial agents and new diagnostic modalities important in the management of these diseases. These advances are important for all practicing ophthalmologists, as they remain the initial entry point for these patients in the health care system. This combination of oncology and pathology reflects increasing overlap of these disciplines as evidenced by their shared inclusion in the Academy's Basic and Clinical Science Curriculum and the Compass Curriculum. This symposium combines ocular oncologists and pathologists in a point/counterpoint format to present the most interesting and controversial topics in ocular oncology and pathology.

Date and Time: Sunday, Oct 17 2010 2:00PM - 3:30PM

Location: McCormick Place

Room: GRAND BALLROOM S100C

Chairs:

Paul J Bryar MD

David J Wilson MD

2:00 PM	Introduction	<i>Paul J Bryar MD</i>
2:02 PM	Intra-arterial Chemotherapy for Retinoblastoma: Pro	<i>David H Abramson MD FACS</i>
2:12 PM	Intra-arterial Chemotherapy for Retinoblastoma: Con	<i>Matthew W Wilson MD</i>
2:22 PM	Retinoblastoma: Collaborative Oncology and Pathology Studies, a Model for the Future	<i>Patricia Chevez-Barrios MD</i>
2:32 PM	Genetic Analysis for Prognosis in Uveal Melanoma: Pro	<i>J William Harbour MD</i>
2:42 PM	Genetic Analysis for Prognosis in Uveal Melanoma: Con	<i>Joan M O'Brien MD</i>
2:52 PM	Melanoma: Collaborative Ocular and Pathology Studies	<i>Hans E Grossniklaus MD</i>
3:02 PM	Zimmerman Lecture	...
3:02 PM	Introduction of Zimmerman Lecturer	<i>Debra J Shetlar MD</i>
3:07 PM	Zimmerman Lecture: Changing Fields in Ophthalmic Pathology—Orbital Concepts	<i>R Jean Campbell, MBCHE</i>
3:24 PM	Presentation of the Zimmerman Medal	<i>Paul J Bryar MD</i>
